Installation Instructions for 12 volt LED Hog Light.

Model #HL-6/12V-1

- 1. Remove the two knockouts from the bottom of the metal control box.**
- 2. Remove mounting hex bolt from package and slide bolt through second hole (furthest hole from latch). Attach LED Hog Light to the bottom of the metal control box.**
- 3. Insert plug into the second hole in the bottom of the metal control box and connect ALL wires.**
- 4. Connect the black (negative) wire to the black battery wire. Connect the red (positive) wire to the red battery wire. The remaining white wire connects to the positive red wire on the 12 volt motor.**

Note: LED Hog Light will only come on when the feeder is activated and will then remain on for 30 minutes and then automatically goes off.
