

Setting up the raccoon trap

- Place bait in the bottom of raccoon trap tube.
- With the small hole in the bottom facing up, and the front opening facing forward. Place the TRIGGER KEY over the SPRING ARM with the notch facing the bottom of the raccoon trap.
- Using one or both hands, suppress the SPRING ARM until the TRIGGER KEY catches the center edge of the TRIGGER HOLE, until raccoon trap is set in the open position.
- Wire the raccoon trap to a tree or post within 20 to 30 feet of your feeder. Deer, hogs, livestock, and domestic animals WILL NOT get caught in this trap.
- Only set the raccoon traps when you can check them daily! Please exercise ethical practices when trapping and removing varmints and rodents. Thank you for using Boss Buck Products safely and ethically.
- (Inside Diameter of Tube) 1 1/2" deep
